Mr. Militeau is the Head of Product, Global Emergency Services with more than 25 years of professional experience in the telecommunications, software and public safety industries. In this role, Mr. Militeau has been instrumental in the development of NG9-1-1 standards, technologies, products and services for the Cloud industry which includes cloud infrastructure and services for the UCaaS, CCaaS and CPaaS markets. In addition, Mr. Militeau has led numerous activities including product strategy, systems engineering, and solutions architecture.

Mr. Militeau led standards development in the telecommunications and public safety industries when at Intrado (West Safety Services) for over 14 years. Mr. Militeau has enjoyed extensive leadership roles in several key industry associations and Standards Development Organizations (SDOs) including Association for Telecommunications Industry Solutions (“ATIS”) and the National Emergency Number Association (“NENA”). He was a prior ATIS Board member when at Intrado (West Safety Services), and is a current ATIS Board member for the ATIS Class C members since 2022. As such, Mr. Militeau has extensive experience and collaboration history with numerous ATIS members, including on the ATIS Emergency Services Interconnection Forum (ESIF), the ATIS Wireless Technology and Systems Committee (WTSC), and several other subcommittees of ATIS, NENA and iCERT.

Mr. Militeau launched his career with Alcatel in Paris (France) as a systems engineer and prior to joining Bandwidth in 2020 as a Product Leader, he was with Intrado (West Safety Services) for 14 years in multiple roles. Mr. Militeau has a Bachelor of Science degree in Electrical Engineering from the University of Provence, Institute of Technology (Marseille, France), a Master’s of Science degree in Telecommunications Engineering from the University of Colorado and a Masters of Business Administration (MBA) degree from the University of Colorado. He is fluent in English, French, and Italian. Mr. Militeau resides in Boulder and works out of the Bandwidth’s Denver, Colorado office.
